## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the

-- "attachment means to electrical energy producing generator" (claim 1),

-- "attachment means to an electrical grid" (claim 1),

-- "multiple subsurface water driven turbines" (claim 2),

-- "multiple above surface water driven turbines" (claim 3),

-- "common electrical energy producing generator" (claim 4),

-- "rigid structure is buoyant" (claim 5),

must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 2834

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There are insufficient antecedent basis for the following limitations in the claims:

- "attachment means to electrical energy producing generator" (claim 1),
- "attachment means to an electrical grid" (claim 1),
- "multiple subsurface water driven turbines" (claim 2),
- "multiple above surface water driven turbines" (claim 3),
- "common electrical energy producing generator" (claim 4),
- "rigid structure is buoyant" (claim 5).

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. As broadly as they can be interpreted and understood, Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Wiedemann (US 4,159,427).

6. As broadly as they can be interpreted and understood, Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Youssef (US 6,023,105).

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being obvious over Salls (US 6,427,768) and further in view of Youssef (US 6,023,105) or Wiedemann (US 4,159,427).

The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art

Art Unit: 2834

only under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 103(a) might be overcome by: (1) a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not an invention "by another"; (2) a showing of a date of invention for the claimed subject matter of the application which corresponds to subject matter disclosed but not claimed in the reference, prior to the effective U.S. filing date of the reference under 37 CFR 1.131; or (3) an oath or declaration under 37 CFR 1.130 stating that the application and reference are currently owned by the same party and that the inventor named in the application is the prior inventor under 35 U.S.C. 104, together with a terminal disclaimer in accordance with 37 CFR 1.321(c). This rejection might also be overcome by showing that the reference is disqualified under 35 U.S.C. 103(c) as prior art in a rejection under 35 U.S.C. 103(a). See MPEP § 706.02(I)(1) and § 706.02(I)(2).

Salls (6,472,768) teaches offshore energy underwater structure, as in instant application, but adds wind generating features, as disclosed by Youssef or Winedemann.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to design an offshore energy platform as taught by Salls and to add above water wind generating structure as taught by Youssef or Wiedemann in order to utilize additional power source (wind power) of energy, especially since applicant failed to show that his invention, as claimed, provides an unusual effect or differs from the obvious design choice.

**Conclusion**

9. The prior art made of record and not relied upon is considered pertinent to applicant(s) disclosure.

10. When the claims are amended, applicant(s) should state in detail where in the original disclosure or in the drawings the amended features find support. **No new matter may be introduced.**
